## OBJECTIVE

To obtain a challenging role as a Frontend Developer, where I can leverage my skills and experience in frontend development, blockchain technologies, and innovative problem-solving to contribute to the success of the company.

## TECHNICAL SKILLS

JavaScript, HTML, CSS, C, Python, React, Git, GitHub, Blockchain, Adobe CC

## PROFESSIONAL EXPERIENCE/TRAINING

### Pengrad

Jun 2019 – Dec 2019

*Frontend Engineer / Co-founder*

- Developed and maintained frontend interfaces for a content writing platform using JavaScript & Tailwind CSS.
- Collaborated with the backend team to ensure seamless integration of frontend and backend functionalities
- Designed and implemented new features and enhancements to improve the user experience and platform functionality
- Conducted user research and feedback sessions to gather insights and improve platform usability
- Managed the project timelines and resources, and led the development team

### Wakaspac Blockchain GameFi

Mar 2022 – Aug 2022

*Frontend Engineer / Co-founder*

- Collaborated with the development team to design and implement frontend features for blockchain-based games
- Developed and maintained user interfaces using JavaScript, and other frontend technologies
- Integrated blockchain technologies such as smart contracts and wallets into the frontend applications
- Led the development of new games and features, and managed the project timelines and resources
- Collaborated with the marketing and design teams to create engaging user experiences and visual designs

## EDUCATION

- **Coursera**

Oct 2022 – present

*IBM Full Stack Software Developer Professional Certificate*

- **African Leadership X (ALX)**

June 2022 – present

Software Engineering

- **Federal University Technology, Owerri, Nigeria**

Nov 2015 – July 2020

Bachelor of Engineering, Petroleum Engineering

GPA: (4.13/5.0)

## SOME PROJECT

- Built a weather application using React and the OpenWeatherMap API, which displays the current weather and forecast for any location.
- Developed a budgeting application using React and Firebase, which allows users to create budgets, track expenses, and receive alerts when they exceed their limits.

- Created a quiz application using React and Trivia API, which allows users to test their knowledge on various topics and compete with friends.

## **RESEARCH INTEREST**

---

1. Machine Learning and Artificial Intelligence
2. Human-Computer Interaction
3. Blockchain Technologies
4. Data Science and Big Data
5. Cybersecurity
